Professional Summary

I am a recently graduated systems analyst with a strong academic foundation and practical experience in web application development. I have comprehensive knowledge of the software development life cycle—from architecture and coding to API integration and deployment. I am passionate about technology, continuous learning, and the world of software development. I stand out for my professional ethics, commitment to results, and excellent communication and teamwork skills. I am seeking my first professional opportunity in software development, where I can apply my knowledge and grow together with the team.

Software Development Experience

Self-taught and Freelancer – Fullstack Developer (Jan 2025 – Present)

- Completed a comprehensive course in Algorithms and Programming Logic (Udemy), focused on analysis, logical structuring, and development.
- Currently pursuing specialization in fullstack development with Java and React, building projects from scratch including architecture, API integration, database management, and cloud deployment.
- Studying and practicing Quality Assurance (QA), including the testing cycle, test case creation, and business rules documentation.

Education

Technologist Degree in Systems Analysis and Development

Uniube – University of Uberaba (Jun 2022 – Dec 2024)

- Gained technical experience in fullstack application development using primarily Java, React, JavaScript, HTML, and CSS.
- Developed solid knowledge in software architecture and Design Patterns, with emphasis on SOLID principles, which I consider a major strength of my education.
- Participated in end-to-end development of web applications, including frontend and backend integration, use of microservices, database modeling, and deployment processes.
- Acquired a strong foundation in object-oriented programming and software development best practices.

Complementary Courses – Udemy Academy (Jan 2025 – Present)

- Web Development with React
- Java – Basic to Advanced
- Object-Oriented Programming
- Programming Fundamentals
- QA Fundamentals and Techniques
- Microsoft Office Suite

Technical Degree in Administration

Irmão Afonso State School (Oct 2018 – Jan 2020)

Technical Skills

Frontend: JavaScript, TypeScript, React, HTML, CSS, Bootstrap, Tailwind CSS, Next.js

Backend & Databases: Java, SQL

Tools & Methodologies: Git, Jira Software, SCRUM

Languages

Portuguese: Native

English: Basic proficiency (beginner to professional level)
